ITI - OWASP Event #7

Location: Online - Zoom

Date: Saturday 10th, June 2023

Time: 10:30am

Agenda items

10:30 - 11:30	Session 1: OWASP API Top 10 - Part One	Mahmoud Elhendy
11:30 - 12:30	Session 2: OWASP API Top 10 - Part Two	Ahmed Abdallah

Sessions Details

A foundational element of innovation in today's app-driven world is the API. From banks, retail and transportation to IoT, autonomous vehicles and smart cities, APIs are a critical part of modern mobile, SaaS and web applications and can be found in customer-facing, partner-facing and internal applications. By nature, APIs expose application logic and sensitive data such as Personally Identifiable Information (PII) and because of this have increasingly become a target for attackers. Without secure APIs, rapid innovation would be impossible.

API Security focuses on strategies and solutions to understand and mitigate the unique vulnerabilities and security risks of Application Programming Interfaces (APIs).
